FOR IMMEDIATE RELEASE

Prime Numbers Technology Introduces New Carbon Emission Reporting Services

Marlborough, MA -- Prime Numbers Technology (Prime), a leading provider of data analytics and reporting solutions for corporate travel, has enhanced their innovative software solution, **Prime Analytics**, to calculate and analyze carbon emissions associated with air, car, hotel and rail travel. Additionally, Prime now integrates with preferred carbon offsetting providers and is developing a carbon budget analysis tool to monitor and manage net impact.

Prime President Mark Bresnahan stated, "We are thrilled to add a robust carbon reporting solution to Prime Analytics. By automating emission calculations, purchasing offsets and establishing budgets in one platform, organizations can effectively monitor and manage their sustainability initiatives with ease."

The critical need for comprehensive carbon emission reporting in the travel sector continues to be a high priority for organizations as they strive to reduce their environmental footprint and prepare for increased greenhouse gas regulations. Prime's comprehensive software harnesses advanced data analytics to help businesses measure, monitor and mitigate carbon emissions across various travel categories. By providing precise and reliable reporting, Prime empowers corporations and travel management companies to make informed decisions and drive sustainable practices.

###

About Prime Numbers Technology

Prime Numbers Technology is a leading provider of data analytics and reporting software, helping organizations optimize their business travel program through global data consolidation, travel and expense integration, predictive analytics, relevant benchmarking, air contract optimization, and travel spend and carbon reporting.
